WorkFlow Link

WorkFlow Link is an optional add-on module for AVT's PrintVision 100% Automatic Inspection platforms. You can use it in conjunction with the optional PrintFlow Manager, a quality reporting management tool.

WorkFlow Link rewinder control station

WorkFlow link rewinder control screen

- Automatically controls and stops the rewinder based on the information from the press
- Automatic identification of the roll
- Clear graphical defects location map with color coding indication
- Display of master and defect images for every detected fault

Reduce waste with 100% AIS on press

As part of the complete workflow solution, 100% AIS on press enables early detection of process defects and allows operators to perform corrective actions in order to avoid printing waste. AIS on press can prevent costly mistakes, prevent re-prints, and enhance productivity. All printing faults, including all random defects, are recorded for removal at the rewinder control station.

Better press and rewinder utilization

Adding AIS to the press enables you to increase speed, while ensuring perfect quality. WorkFlow Link also allows you to increase the finishing machine speed by eliminating the need to stop for every suspected defect. Now the operator can let the machine run at full capacity, slowing down automatically only for real defects.

Improve Quality Assurance

PrintFlow and PrintFlow Manager allow your Quality Assurance (QA) team to make the decisions on which defects need to be removed. This process is easy and fast, and will ensure that the rewinder is able to run at full speed, stopping only on the defects to be removed.

The quality reports can be used for statistical analysis. This improves your entire process on an ongoing basis and facilitates communication with your customers.

Eliminate customer rejections

WorkFlow Link, combined with AVT's 100% Automatic Inspection Systems (AIS) on press, ensures that you find all defects and enables you to efficiently remove them before shipment to customer.

Never settle for less than the best - For your business and your customers !

Advanced Vision Technology

Together we make the *difference*
